Subject: Setting up a conference call with R10 and Nez Perce Tribe to discuss the ID HHC

Dear Colleagues:

I spoke with Joe Oatman and Dave Johnson from the Nez Perce Tribe today, who are copied on this message. They are beginning to have some discussion about the proposed ID HHC with other parties including IDFG and have some technical questions to ask EPA about the state proposal in relation to the Nez Perce 234 FCR rate which came out of the ID FCR survey.

I told them we would set up a call with them to discuss this work, which will probably occur the first or second week of April.

I am going to ask Melody Poland to help set up the call through a Doodle poll. Please let me know if you do not want to be on call or if someone else should be added.

Thanks, ml

Stu, John, and Rhonda:

Thanks for speaking with Lisa and me last week. Here are the follow up materials that we discussed during our call:

1. EPA's comments on Washington's proposed human health water quality criteria rule. In addition to the cover letter, pages 2-6 of the comments contain the general tribal treaty rights discussion and the more specific discussion on fish consumption rates and cancer risk level.
2. EPA's Federal Register notice of proposed human health water quality criteria rule for Washington. Section IV. on pages 5-6 (Pages 55067-8 of the Federal Register) contain the general discussion of tribal reserved rights and the more detailed discussion regarding fish consumption rates and cancer risk level.
3. EPA's comments on Idaho's proposed human health water quality criteria rule. Page 3 discusses tribal treaty rights in the context of fish consumption rates.
4. EPA's disapproval on Maine's revised human health criteria in Indian Country. Pages 2-3 of the Executive Summary discuss the tribal sustenance fishing use and protecting the sustenance fishing use.

Let me know if you have any questions about the materials. I hope to talk to you soon.

Thank you,
